DETAILED ACTION

Status of Claims

Claims 1-40 are pending in this application and are the subject of the Office action.

Restriction and Election Requirement

Restriction to one of the following inventions is required under 35 U.S.C. 121 and 372:

This application contains the following inventions or groups of invention which are not so linked as to form a single general inventive concept under PCT Rule 13.1.

In accordance with 37 CFR 1.499, applicant is required, in reply to this action, to elect a single species to which the claims must be restricted.

- I. Claims 1-33, 38, and 39 drawn to the use of a compound of formula I as recited in claim 1 in the preparation of a composition for inhibition of kinase activity. If this Group is elected, then the below Summarized Species Election requirement is also required.
- II. Claim 34, 37, drawn to a method of treatment of diseases or conditions mediated by excessive or inappropriate kinase activity. If this Group is elected, then the below Summarized Species Election is also required.
- III. Claim 34, drawn to a compound of formula I for use in human or veterinary medicine, particularly in the treatment of diseases or conditions mediated by excessive or inappropriate kinase activity. If this Group is elected, then the below Summarized Species Election is also required.

10/551,177 Art Unit: 1611

IV. Claim 40, drawn to a pharmaceutical composition.

Inventions I, II, and III as represented above relate to a general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, they share the same or corresponding technical feature i.e. compounds having a pyrazolo pyrimidine structure as recited, for example, in claim 1. However, the common technical feature is known in the art in view of the teaching of Tsuneo (JP 10101671, English abstract only). Thus, the inventions lack unity in view of Tsuneo.

For the above reasons, the restriction is proper as the inventions lack unity of invention under PCT 13.1.

Applicant is required to elect a single invention for examination purposes.

Species Election regarding Groups I-IV

This application contains claims directed to more than one species of the generic inventions. These species are deemed to lack unity of invention because they are not so linked as to form a single general inventive concept under PCT Rule 13.1.

For example, the generic inventions encompass a multiple different of chemical compounds of formula I, which would reasonably exhibit varying pharmacologic effects and side-effect profiles. Methods of treatment comprising compositions of these different compounds of formula I would reasonably have different treatment effects when administered to an individual. Thus, these species are deemed to lack unity of

invention because they are not so linked as to form a single general inventive concept under PCT Rule 13.1.

In accordance with 37 CFR 1.499, applicant is required, in reply to this action, to elect a single disclosed species for examination purposes from the following list:

- 1) a single completely chemically defined compound of formula I.

 If applicant elects Group II or III, then applicant is further required to elect:
 - 2) a single disease/condition species.

Applicant is advised that a reply to this requirement must include an identification of the species that is elected consonant with this requirement, and a listing of all claims readable thereon, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered nonresponsive unless accompanied by an election.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to the additional species which depend from or otherwise require all the limitations of an allowable generic claim as provided by 37 CFR 1.141. If claims are added after election, applicant must indicate which are readable upon the elected species (MPEP 809.02(a). Claims 1, 29, and 33 are considered generic to the above species.

Inventorship Notice

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one

10/551,177 Art Unit: 1611

or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).

The examiner has required restriction between product and process claims. Where applicant elects claims directed to the product, and the product claims are subsequently found allowable, withdrawn process claims that depend from or otherwise require all the limitations of the allowable product claim will be considered for rejoinder.

All claims directed to a nonelected process invention must require all the limitations of an allowable product claim for that process invention to be rejoined.

In the event of rejoinder, the requirement for restriction between the product claims and the rejoined process claims will be withdrawn, and the rejoined process claims will be fully examined for patentability in accordance with 37 CFR 1.104. Thus, to be allowable, the rejoined claims must meet all criteria for patentability including the requirements of 35 U.S.C. 101, 102, 103 and 112. Until all claims to the elected product are found allowable, an otherwise proper restriction requirement between product claims and process claims may be maintained. Withdrawn process claims that are not commensurate in scope with an allowable product claim will not be rejoined. See MPEP § 821.04(b). Additionally, in order to retain the right to rejoinder in accordance with the above policy, applicant is advised that the process claims should be amended during prosecution to require the limitations of the product claims. Failure to do so may result in a loss of the right to rejoinder. Further, note that the prohibition against double

patenting rejections of 35 U.S.C. 121 does not apply where the restriction requirement is withdrawn by the examiner before the patent issues. See MPEP § 804.01.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Charlesworth Rae whose telephone number is 571-272-6029. The examiner can normally be reached between 9 a.m. to 5:30 p.m. Monday to Friday.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Michael Woodward, can be reached at 571-272-8373. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR.

Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see http:pair-direct.uspto.gov. Should you have any questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 800-217-9197 (toll-free). If you would like assistance from a USPTO Customer Service Representative or access to the automated information system, call 800-786-9199 (IN USA OR CANADA) or 571-272-1000.
